

## Great Reasons Your Small Business Needs an S&T Business Phone System

A cloud phone system isn't just a tool reserved for big business - read on to learn how Harmony from S&T Business Phone can help your small business grow!

### Flexibility and Scalability

S&T Business Phones is customizable to your needs. As your small business grows, a cloud communications solution like Harmony grows with you: simply add new features and users as needed.

### Increase Productivity

Harmony comes packed with VoIP-enabled features like call recording, voice-mail-to-email, transcription, and more, boosting productivity with tools that go beyond traditional telephony.

### No IT Team Needed

With S&T Business Phones, you don't need an IT team to manage your communications. It's easy to self-manage your Harmony phone system through a user-friendly web portal.

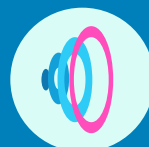

### Accessibility

You can make and receive calls from anywhere with an internet connection. With Harmony, your team is virtually everywhere they need to be—even when they're on the move.

### Cost-Effective

An S&T Business Phone solution can help small businesses save in various ways: lower long-distance bills, fewer equipment requirements, and no extra fees for customizations.

### Quality

With a strong internet connection, Harmony delivers crystal-clear call quality, often better than traditional phones.

### Convenience

The app turns any smartphone, PC, or tablet into your business extension. Take calls on personal devices while keeping business and personal communications separate.

### Additional Features

S&T Business Phones is feature-rich, providing all the communication tools your business needs in one solution.

### Security

Today's encryption protocols mean that S&T Business Phones keep your calls and data secure – something that can't be done with a regular telephone connection.
